NLIS JUMBO LEADER TAG

JLT

NLIS Jumbo Leadertag is used for long term application and better stock management. The tags come with strong arms and possess anti-snagging design. The shape of the product holds the tag in correct position at all times and it is constructed of specially formulated material with a larger print area than the traditional Leadertag.

They are available in 11 bright colours and designed to withstand the harshest of UV conditions to ensure sustainability and avoid fading.

Use a different colour for each age group to save time when drafting for each age and gender. Place NLIS Jumbo Leadertags in opposite ears for ewes and wethers making drafting of sex easy and accurate.

NLIS Jumbo Leadertags are applied using the Applicator Aluminium Leadermatic and Non-NLIS options are available.
